Dennis, Sorry its taken a while but I received the approved Council drawings last friday and I am reluctant to release unapproved drawings for planning purposes.

There are no poles, trees, pits manhole or the like to go in the verges at this stage. The only permanent structure is the culvert at the intersection as shown in the interesection detail.

Access to the lot off BROWNLIE is not regarded as optimal as BROWNLIE is likely going to be the busier of the two frontages. Entry to the property adjacent to the northern bdy is likely the best option for a safe and visibility assisted entry to ULLA.

The Council response is likely a "proforma" response they send as advice to all proponents, regardless of the actual zoning so most of the info suggested is a "catchall".

Hope this helps.

If you need further advice please ring me on 0427644640.

Regards,

John Montgomery

Hi John

Please share the requested information asap so we can finalise the resubmission to Council

- the civil/engineering design drawings for Brownlie Street, specifically the section adjacent to Lot 91
- Proposed verge infrastructure locations (street trees, power poles, drainage pits, manholes, footpaths)
- Proposed crossover location for Lot 91

Thank you John

Hi John

Can you please share the below with me asap, as requested by Barry

++++

As you're aware, we're preparing the Development Application for the display home on Lot 91 Brownlie Street, Waggrakine.

One of the Council's requirements for the DA is that our site plan shows verge infrastructure along the Brownlie Street frontage — specifically the location of street trees, power poles, drainage pits, manholes, crossovers, footpaths, and any other verge structures.

Manufacturer has kindly redrawn for the additional requested carpark (see attached) but since titles haven't been issued yet and the verge infrastructure isn't physically in place, can I ask if the current subdivision civil engineering drawings show the proposed infrastructure on the site plan?

if yes, could you please provide (or ask your civil engineer to provide) the following:

- The civil/engineering design drawings for Brownlie Street, specifically the section adjacent to Lot 91

- Proposed verge infrastructure locations (street trees, power poles, drainage pits, manholes, footpaths)

- Proposed crossover location for Lot 91

If not, please advise that also, so I can include as a note to the Council.
